Resilient Solutions for an Evolving World

We help clients reach mission-success through innovative and leading-edge technology solutions that are tailored to their challenges. We know there's no single solution to the technology challenges that our government faces. We work in lockstep with our customers to understand the complexities of the challenge, evaluate the requirements needed to solve the problem, and recommend a solution that best fits the culture of the organization.

Enterprise IT

Our services are geared towards our customer's mission and future. We focus on the alignment of the business and technology needs of our clients to improve performance, preserve investments, and deliver mission-driven solutions. We have capabilities across the Enterprise IT ecosystem, like network operations, end-user support, data center management, high-performance computing, and more to maximize mission effectiveness.

Cybersecurity

Our cyber experts deploy tactics and drive strategies that build resiliency, enhance defenses, and mitigate issues. From penetration testing to security engineering, incident response to vulnerability management, our team future-oriented tools and tactics to protect the organizations we serve from cyber threats.

Application Services

At Edgewater, our goal is to help organizations modernize systems, remove inefficiencies, and automate processes. We use agile engineering processes and collaboration techniques to build solutions that meet business requirements, help organizations improve efficiency, and reduce legacy application risks.

Digital Transformation and Innovation

Whether it's a complete organizational digital overhaul or a department-specific workflow challenge, our methodology helps our clients establish a roadmap for successful process improvement and business transformation results.

Data Science and Analytics

We partner with organizations that want to get insights from their data so they can access historical trends, create data visualization and plan core business operations for the future.

Program Management

We specialize in program and project management support for mission-critical initiatives that affect the trajectory of entire organizations. Our team builds partnerships between IT and business leadership, enabling everyone to drive forward toward the same goals — program execution and a successful outcome.
